

Goodbye Scotia, Hello MultiSeal

YuSeal Limited is offering a revolutionary alternative to scotia. MultiSeal is a flexible continuous PVC strip infused with antibacterial compound, with a flipper on one side and a high grade double sided glue on the other that seals under tension. More cost effective than scotia, MultiSeal is the obvious choice. MultiSeal is eco friendlier too and with every box of 200m sold, we save approx 15 tubes of silicone going to landfill!

Available in 5m and 25m rolls
and 2 different widths,
6 x 6 mm and 10 x 8 mm.

MultiSeal is currently available
in white, clear, grey and black.

Easy to fit, durable and an
evenness of finish difficult to
achieve with other products,
MultiSeal can be fitted on a
multitude of different floorings;
laminated, tiles, vinyl and more.

We strongly advise you follow
the fitting instructions to
install MultiSeal.

Surface preparation is key and
to further improve results, our
fitting kit, simple cutter, mitre
cutter and profile pusher have
been specially developed to
ensure the installation of
MultiSeal is easy.
